## RESEARCH INTERESTS

### Out-of-Distribution (OOD) Generalization Problem

I am working to develop algorithms with stable performances under agnostic distributional shifts, including Distributionally Robust Optimization methods and Invariant Learning methods. And I am now the maintainer of the OOD generalization paper list on page <http://out-of-distribution-generalization.com> (2.6k+ Pageviews).

### Machine Learning and Causal Inference for Biology

with BGI Big Data Center

I am working to incorporate causal inference into machine learning to develop explainable and trustworthy algorithms for analysis of Single-Cell RNA Sequence data on COVID-19 and Alzheimer's Disease.
